

At the Opensource Experience trade show, Linutop announces the availability of an AI for the Raspberry Pi, *The most affordable plug and play Installation allows to use an private AI chat.*

Paris, France – December 4th, 2024 – Linutop, specialized in energy-efficient IT solutions, presents an AI for Linutop OS on the **Raspberry Pi or small PCs**. The installation allows to use a generative chat on Raspberry Pi in private.

- Benefits:

- Energy efficient power consumption used by Raspberry Pi.
- Private and confidential as it can be used offline.

- Use – Generative chat AI allows you to generate texts and content at will, it can be a source of inspiration for an article or help to structure ideas while remaining private.

- Power saving – AI is often synonymous with energy consumption Yet this AI runs on a Raspberry and consumes very little energy. The small LLM (Large Language Model) available, work even with reduced power.

- Privacy – AI can operate offline ensuring completely private use.

- The market – Introduction to the use of AI, generation of content for digital signage, or communication while preserving the confidentiality of the source.

Compatibility: Raspberry Pi: 3, 4, 400, 5 and PC. 5 Ram 1GB in and PC Ram 2GB min.

Availability: Free demo version: www.linutop.com/software/download.en.html
